PL Data Analysis Using Python

Topic Overview:

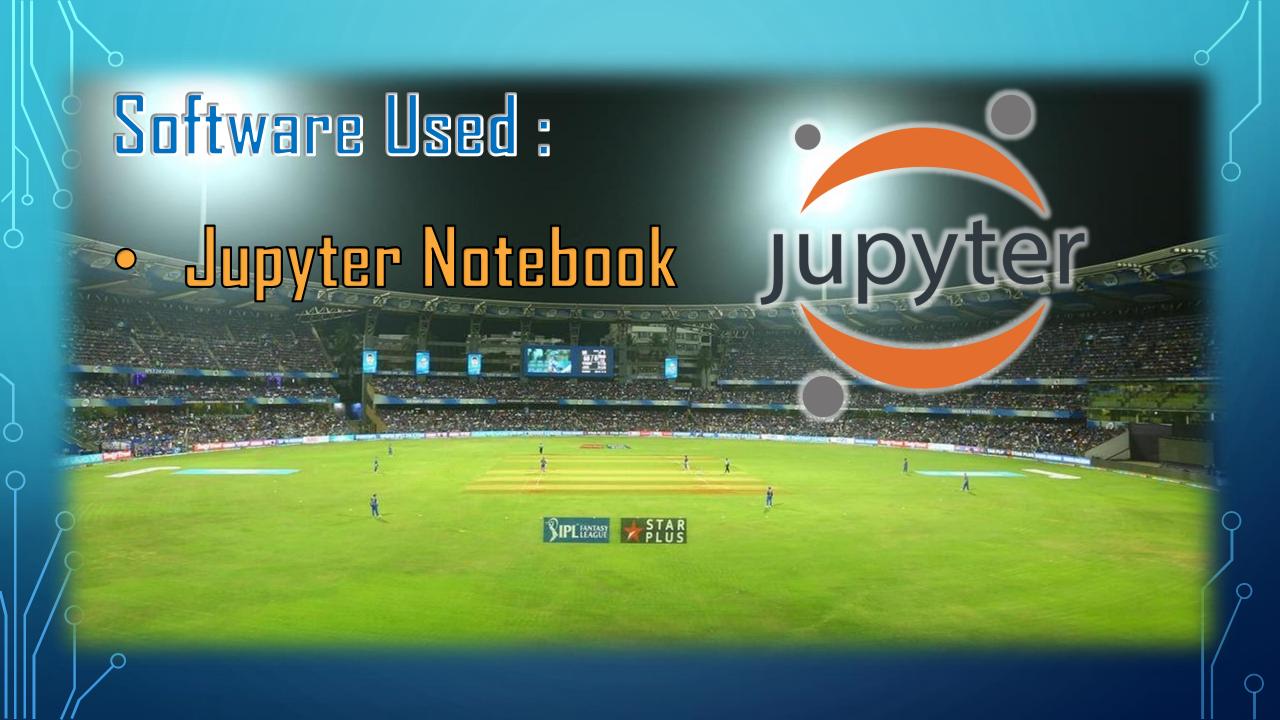

We are Analyzing the data of IPL from the Year 2008 - 2019

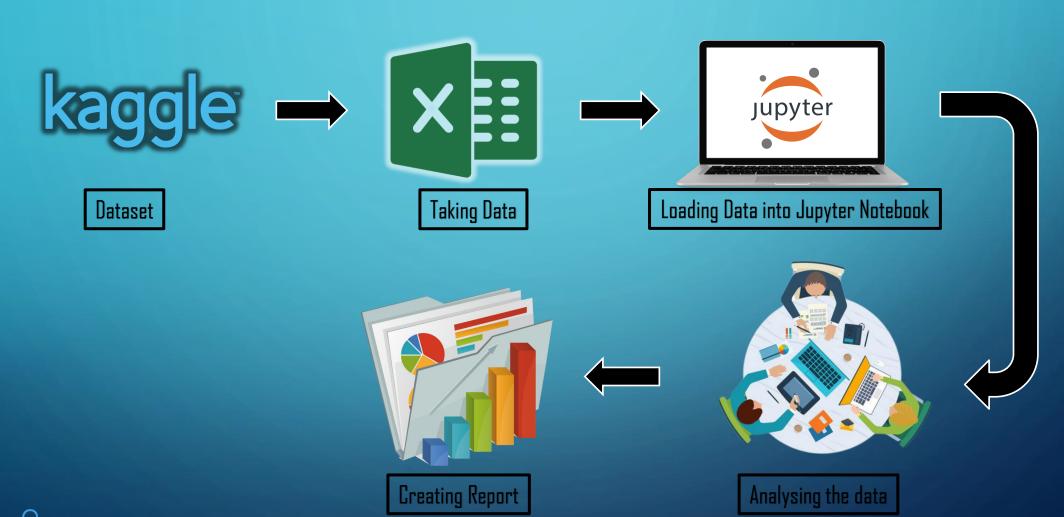

Data Collection:

We have collected the Dataset from:

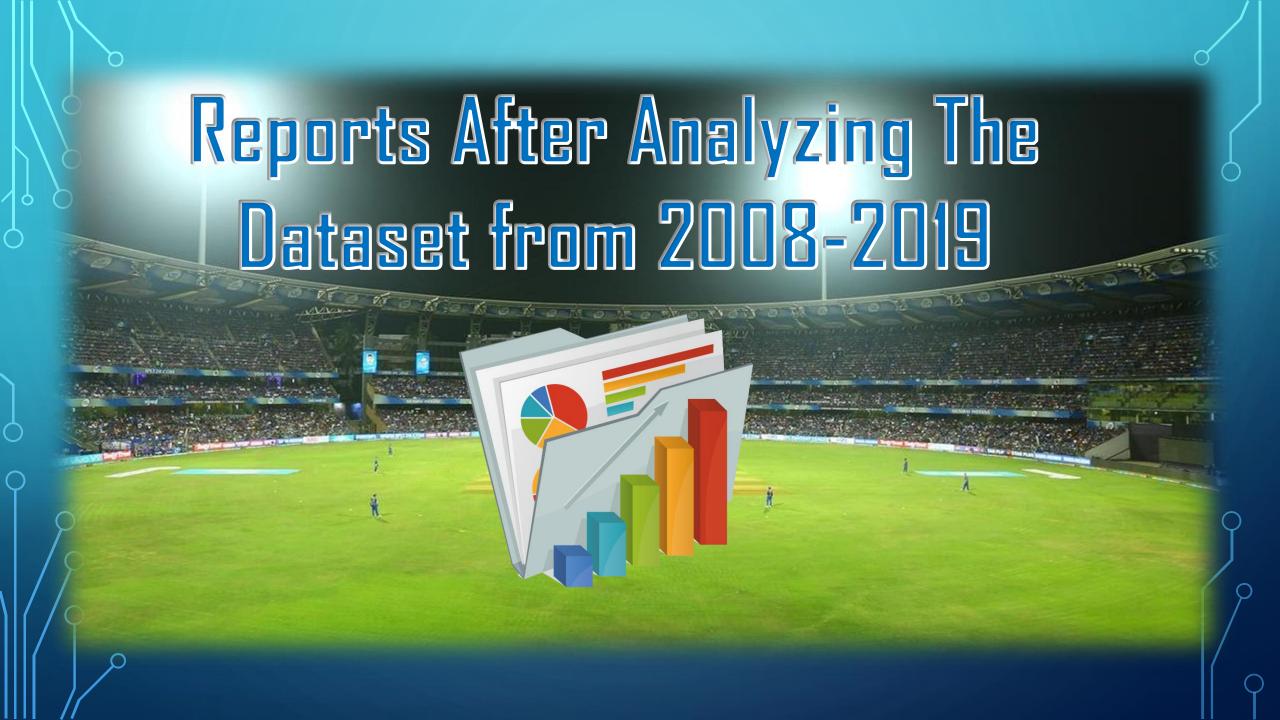

Flow Chart Of The Project:

Libraries Used:

- NumPy: NumPy is a Python library that provides a simple yet powerful data structure
 the n-dimensional array .This is the foundation on which almost all the power of Python's Data Science toolkit is built.
- Pandas: Pandas is a Python library mainly used for data analysis. Pandas allows
 importing data from various file formats such as comma separated values.
- Matplotlib: Matplotlib is a comprehensive library for creating static, animated, and interactive visualization in Python.
- Seaborn: Seaborn is a Python data visualization library based on matplotlib. It provides a high-level interface for drawing attractive and informative statistical graphics.

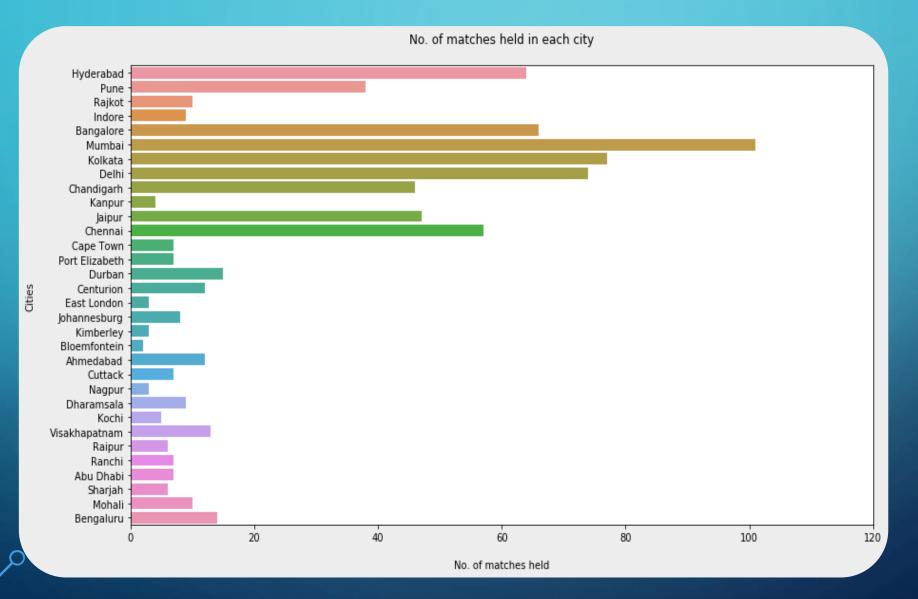

1. MATCH WON BY THE MAXIMUM MARGIN OF RUNS IN THE IPL SEASON 2008-2019

We have found that, Match Won By The Maximum Margin Of Runs was 146 in the IPL season 2017. The Match was between Mumbai Indians and Delhi Daredevils.

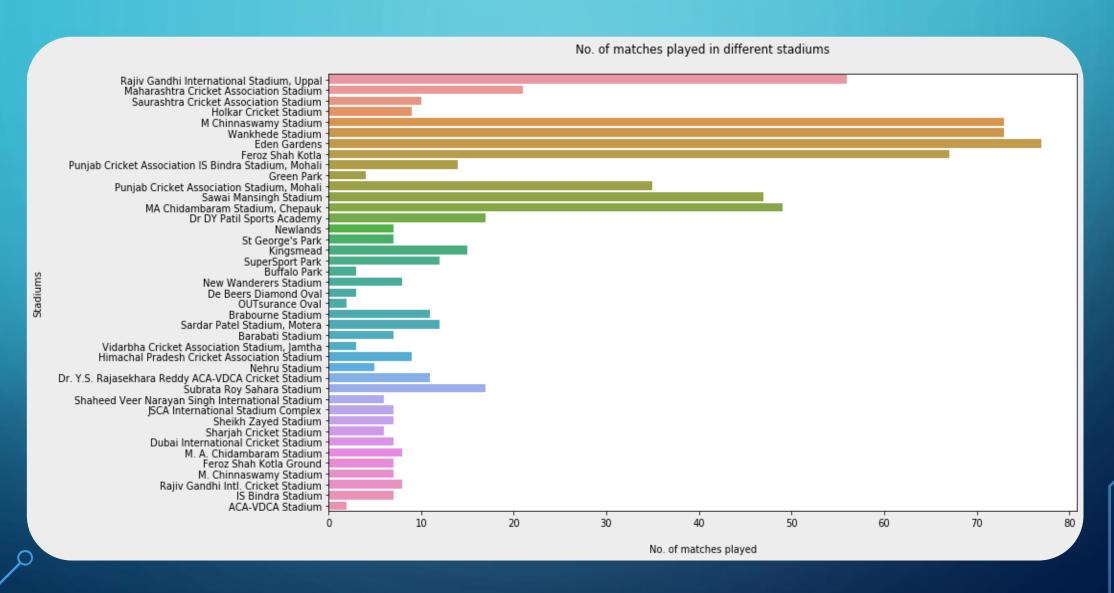

Match Result: Mumbai Indians won by 146 runs
